SKILLS SUMMARY

- **Languages:** Python, JavaScript, SQL
- **Frontend:** React.js, Node.js (familiar), FastAPI, REST APIs
- **Tools/DBs:** PostgreSQL, Git, Ollama (Llama 3, Mistral, phi3:mini), Pandas, NumPy, Tableau
- **AI / ML::** RAG Pipelines, LLM Integration, NLP, Embeddings, Vector Databases (FAISS), Prompt Engineering
- **Cloud:** AWS(Cloud Foundation)

EXPERIENCE

- **AI and Backend Developer – Industry Mentored Project**
Intern, Strokr Technologies *Early 2026*
 - **Backend API Development** Designed and implemented 15+ REST APIs using FastAPI, supporting document ingestion, querying, and response generation for AI-powered systems.
 - **RAG Pipeline Engineering** Built end-to-end Retrieval-Augmented Generation pipelines processing 1,000+ documents with chunking, embedding generation, and semantic retrieval using FAISS.
 - **LLM Workflow Design** Integrated Llama 3-based LLM workflows, improving response accuracy and contextual relevance by approximately 35%.
 - **Performance Optimization** Reduced average query latency by 30% through embedding optimization, efficient indexing, and retrieval tuning.
 - **Scalable System Design** Engineered backend services capable of handling concurrent users and large document repositories with high availability.

PROJECTS

- **XCalibr – AI-Powered Hiring System**
GitHub
 - **Semantic Candidate Screening** Developed an AI-driven recruitment system using Llama 3 to evaluate resumes based on semantic similarity, improving candidate-role matching accuracy by 40%.
 - **Resume Intelligence Pipeline** Built automated resume parsing and skill extraction workflows processing 500+ resumes, enabling structured candidate profiling.
 - **Trust Score Validation System** Designed a Trust Score mechanism integrating GitHub and LeetCode APIs to validate technical claims, reducing false-positive profiles by 25%.
 - **Automated Candidate Feedback** Implemented an automated feedback system that delivered personalized insights to candidates, improving engagement and transparency.
 - **Backend Architecture** Architected a scalable FastAPI backend managing candidate scoring, AI inference, and third-party API integrations.
 - **Recruiter Dashboard** Developed a React.js dashboard to visualize candidate rankings, scores, and evaluation metrics for faster hiring decisions.

CERTIFICATIONS

- **AWS Cloud Foundations** Certified in cloud computing concepts, AWS core services, security best practices, pricing models, and scalable architecture design.
- **Artificial Intelligence Fundamentals** Completed hands-on training in machine learning, neural networks, NLP, and applied AI use cases via Infosys Springboard.
- **Python Programming** Demonstrated proficiency in Python, data structures, OOP, file handling, and algorithmic problem solving.
- **Data Analysis with Python** Performed data cleaning, analysis, and visualization using Pandas, NumPy, and Matplotlib on real-world datasets.
- **Data Visualization Using Power BI** Learned advanced data visualization techniques, dashboards, and AI-assisted analytics using Power BI.
- **AI Tools and Workflows** Gained practical exposure to prompt engineering, AI toolchains, and applied LLM workflows.

EDUCATION

- **Amrita Vishwavidhyapeetam** Kochi, India
M.C.A - AI & DS; Ongoing *Completion in 2028*
Courses: Object-Oriented Programming using Java, Business Analytics and Visualization, Big Data Analytics, Advanced Database Management Systems, Computer Vision, Mathematical Foundations for Computing
